## **DETAILED ACTION**

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-60 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,740,308 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-60 are generic to all that is recited in claims of U.S. Patent No. 6,740,308 B2. That is, claims of U.S. Patent No. 6,740,308 B2 fall entirely within the scope of claims 1-60, or in other words, claims 1-60 are anticipated by claims of U.S. Patent No. 6,740,308 B2. Specifically, the compositions of claims 1-30 and the method of making the compositions of claims 31-60 are anticipated by the compositions for delivery of claims 1-6 and the method of making the compositions recited in claims 7-16 of the reference claims. The rate of particle formation of the instant claims are disclosed in the specification of U.S. Patent No. 6,740,308 B2.

Application/Control Number: 10/768,293

Art Unit: 1616

Claims 1-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/749,536. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-30 are generic to all that is recited in claims of copending Application No. 10/749,536. That is, claims of copending Application No. 10/749,536 fall entirely within the scope of claims 1-30, or in other words, claims 1-30 are anticipated by claims of copending Application No. 10/749,536. Specifically, the compositions of claims 1-30 are obvious over the method of administering of claims 21 and 22 and the kit comprising a composition and a device for administering it as recited in claims 23-31 of the reference application. The rate of particle formation of the instant claims are disclosed in the specification of the reference claims.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mina Haghighatian whose telephone number is 571-272-0615. The examiner can normally be reached on core office hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary L. Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
